

UserType

You can find a prepared test method for exercise 3 in the *TestUserTypeExercises* class in the *Exercises_UserType* project.

1. What are 2 things you can do with a *UserType* that you can't do with an *AttributeConverter* (in Hibernate 5)?
2. How can you assign a *UserType* to an entity attribute?
Which option do you prefer?
3. Implement a *UserType* that persists the *ReviewText* class as a *String*.
