

## Stored Procedure Calls

You can find prepared test methods for the exercises 2 and 3 in the `TestStoredProcedureExercises` class in the `Exercises_StoredProceduresQuey` project.

1. Why can it be more efficient to call a stored procedure instead of performing the logic in your business tier?
2. Use a `@NamedStoredProcedureQuery` to call the stored procedure `calculate` with the parameters 4 and 5.
3. Use a `StoredProcedureQuery` to call the `get_reviews` stored procedure for the Book with id 2.
